

VALIDATOR COMPACT

Streamline Cash Delivery and Safekeeping

If you are looking for a compact and convenient smart safe, this is the perfect choice for you. This sleek and stylish safe has all the features of the Validator Pro, but in a smaller package that fits under any counter or desk. The Validator Compact is the ideal solution for businesses that need a smart and secure way to manage their cash.

Control

Provides full visibility of cash deposits, collections and audit data across all branches.

Efficient

Maximize resource utilisation and reduce operational expenses, ensuring tangible return on investment.

Security

Our robust security protocols guarantee that only preapproved individuals have authorised access.

Support

You receive unwavering support from our top-tier Field Operations and Service Desk, leaders in the industry.

VALIDATOR COMPACT

Dimensions

Tech Specs

Usability

The Validator Compact is designed to be user-friendly and intuitive, with a 7" touchscreen that guides you through every step of the deposit process. You can also print receipts and reports with the internal thermal printer or access the data online via the Validator portal.

Flexible and Adaptable

The Validator Compact is a convenient cash deposit safe that can handle different types of banknotes and currencies. It can fit under a desk or a counter, saving you space and time. You can also add an optional float safe to store your change and coins securely.

Automatic Note Processing

The Validator Compact uses advanced technology to validate each note and check for forgeries, ensuring that your deposits are accurate and secure.

Services Options

Maintenance:

The Validator Compact is a durable and robust cash deposit safe that requires minimal maintenance. However, if you want to ensure the optimal performance and longevity of your safe, we offer a maintenance contract that covers all parts and labour costs, excluding note jams or wilful neglect. With our maintenance contract, you can enjoy peace of mind and hassle-free service.

Portal licence

Validator safes are connected to our online reporting portal, where you can access all your transactional information from any device, an annual fee is required to use this service.

Software Options

The Validator app gives you access to a range of management functions, such as:

- Viewing the total cash amount in the safe
- Viewing the activity log of all transactions
- Printing detailed reports of deposits, withdrawals, collections and users
- Adding or removing users on the safe or remotely via Validator Portal
- Opening the float safe with a RFID fob and PIN
- Carrying out standard admin functions such as downloading new note-sets

Validator Safes are connected to our online reporting portal, where you can access all your transactional information from any device. On the portal, you can:

- View and analyse your transactions by date, time, user, till, or safe
- Generate reports and export data for further analysis or accounting purposes
- Add or remove users remotely
- Issue temporary or one-use codes for emergencies or maintenance
- Manage your account settings and update your contact information

Hardware Configuration

The Validator Compact can be fitted with up to 2 advance note reader's choice of:

- Single note feed (SNF)
- Bunch note feed (BNF)
- Note recycler (SCR)

It can also be fitted with an optional 60 litre 300mm £2,000 OCR float safe
